

DIGITAL PAYMENT BOOK

Description:

Payment book application is designed to maintain customers, payments and their purchases. A retailer will be an admin of the application and each customer of the retailer's shop will be the user. Customers can create their account in the payment book app by reading and agree to the terms and conditions of the shop.

Expected Solution:

Once a user created their account, they can login to their account by using their own credentials, users will be able to see their purchase history, pending payments and also if the user is having any doubt or complaints, they can contact the retailer by using contact us service. Admin will maintain data about purchases made by the customers & can see payment details and pending payment of the customers. Admin will send alerts to the customers if there is any due for payment or payment is pending for a long time.

Technologies & Tools:

Flask, IBM DB2, Docker, OpenShift Dedicated, React, React Native, Node JS, Express JS
